Description	Hours/Qty	Rate	Amount
This is the final payment for the Irrigation upgrades as laid out in the original bid proposal. The controllers have been installed with the rain/freeze sensors. There has been many additional hours put into the project. Flow sensors can still be installed going forward as that money was used to install the controllers that had not originally been identified as existing in the original request. Labor		17,500.00	17,500.00
	40	80.00	3,200.00
The system has been working with central reporting and control as requested. There are still many weaknesses with in the system from a hydraulic point of view. This greatly affects the efficiency at which water can be delivered to the landscape. Much has been done over the year to improve this but there has been a challenge with having district employees executing the improvements and upgrades as advised.
