

RESOLUTION NO. 2026-10

**RESOLUTION
OF THE BOARD OF DIRECTORS OF
TRIVIEW METROPOLITAN DISTRICT**

ADOPTING WATER ENGINEERING STANDARDS

WHEREAS, Triview Metropolitan District (the “**District**”) is a quasi-municipal corporation and political subdivision of the State of Colorado; and

WHEREAS, pursuant to § 32-1-1001(1)(h) C.R.S., the Board of Directors of the District (the “**Board**”) shall have authority over the management, control, and supervision of all the business and affairs of the District, may adopt policies, rules and regulations related to the services and improvements it provides, and all construction, installation, operation, and maintenance of the District’s improvements; and

WHEREAS, pursuant to § 32-1-1001(1)(k), C.R.S., the Board is authorized to furnish services and facilities without the boundaries of the District and to establish fees, rates, tolls, penalties, and charges for such services and facilities; and

WHEREAS, pursuant to § 32-1-1001(1)(j), C.R.S., the Board is authorized to fix and increase or decrease fees, rates, tolls, penalties, or charges for services, programs, or facilities furnished by the District, and pledge such revenue for the payment of any indebtedness of the District. Until paid, all such fees, rates, tolls, penalties, or charges constitute a perpetual lien on and against the property served; and

WHEREAS, the Board has determined it to be in the best interests of the District, and the property owners, taxpayers, and residents of the District, to operate and maintain certain facilities benefitting property and inhabitants within the District, which facilities include water improvements, facilities, appurtenances, and rights-of-way (collectively, the “**Facilities**”) and the provision of water through the Facilities (the “**Services**”); and

WHEREAS, the Board desires to adopt policies to protect the Facilities, including but not limited to the District’s water system, to ensure the Facilities are designed and constructed consistent with Water Engineering Standards (the “**Water Engineering Standards**”); and

WHEREAS, the Board has developed Water Engineering Standards in good faith for the purposes of promoting the health and safety of its residents in relation to the Services provided by the District and the larger community, and supporting long-term operation and viability for the Facilities; and

WHEREAS, the Board believes the Water Engineering Standards to be in the best interests of the District, its residents, and the general public.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD AS FOLLOWS:

1. Adoption of the Water Engineering Standards. The District hereby adopts the Water Engineering Standards set forth in **Exhibit A**, attached hereto and incorporated herein by this reference, as may be amended from time to time.

2. Severability. If any part, section, subsection, sentence, clause, or phrase of this Resolution or the Water Engineering Standards is for any reason held to be invalid, such invalidity shall not affect the validity of the remaining provisions.

3. Term. This Resolution and the Water Engineering Standards shall become effective immediately, and shall supersede any previously adopted resolution, policy, or Water Engineering Standards of the District regarding water engineering standards in relation to the design, construction, and inspection of the Facilities, and the operation and provision of the Services. In cases of conflict, the standards provided in the Water Engineering Standards shall govern. The Water Engineering Standards shall be supplemental to the District's Rules and Regulations for Water and Wastewater Service and shall not supersede the Rules and Regulations. The Water Engineering Standards shall remain in full force and effect until such time as they are amended, superseded, rescinded, or repealed by the Board.

4. Fees. The District hereby establishes the fees set forth in **Exhibit B**.
